WORK EXPERIENCE

Oracle
Denver, CO

Business Analyst – Cloud Operations
Oct 2014 - Nov 2015

- Analyzed infrastructure performance metrics for Oracle's cloud datacenters to plan future capacity shortages
- Created a procurement model to forecast infrastructure purchases with 6 months lead time
- Developed an excel model to track project progress over 16 week transit period for inbound server hardware

Techstars (Wellhire)
Sept 2014-Oct 2014

Intern
- Developed the investor presentation for the company's first round of fundraising and demo day pitch

Accenture
Denver, CO

Senior Analyst – Systems Integration

Application Sustainment Specialist
Nov 2013-Sept 2014

- Acted as a hybrid QA/Product Owner during product Beta launch, focused on high impact production defects
- Performed root cause analyses on production incidents resulting in $750,000 in product enhancements
- Resolved the highest number of high impact production outages as the junior most team member

Quality Assurance Lead
Jul 2012-Nov 2013

- Coordinated 20 UAT & automation testers during testing of mobile and web vacation planning applications
- Analyzed the complexity & risk of bi-weekly production releases to define testing scope and timeline
